## HETMAN UNERASER RESTORES EVERY SINGLE BIT YOU LOST

*Although hardware manufacturers report of doubling the size of hard drives and memory cards with amazing regularity, the reliability of these media remains almost the same it has always been. Which means that chances are high that data may be lost due to hardware failures, power interrupts or jumps and errors in the file system. When accidents happen and valuable information is lost, an efficient data recovery tool is what every user needs. Hetman Uneraser will be there to help when all other remedies have been exhausted and will help restore files that seem lost forever.*

**June X, 2008:** Hetman Software is glad to announce the release of Hetman Uneraser, a compact data recovery tool with an intuitive user interface and recovery capabilities that make it a universal solution for restoring all file types from a wide range of media. Hetman Uneraser supports all file types, all major file systems and works with any types of media connected to the user's system.

The software is intended for recovering files lost after power failures and jumps, hardware/software errors and human mistakes. One of the most remarkable features that Hetman Uneraser has to offer is the ability to preview files prior to restoring them. "We intended to create a tool that would let people see what they are restoring. Many applications on the market restore data, but leave users pretty much unaware what exactly they are getting in the end. We wanted to go the other way and seems like we did a good job with that. Our test groups liked this feature a lot," says Michael Miroshnichenko, CEO of Hetman Software. Users can now obtain the list of recoverable items for the selected location, sort it by a number of criteria and even search the list to find exactly what they need. The process of data recovery is very similar to working with the standard Windows Explorer and files can be recovered with a single mouse click.

Hetman Uneraser is a universal tool for all categories of users that need an efficient remedy in situations when data needs to be recovered right away. Thanks to its intuitive interface and the file preview feature, it will be equally appreciated by novices and advanced users.

### Pricing and Availability

Hetman Uneraser fully supports Microsoft Windows 9x/NT4/2000/XP/2003 Server. A free trial version of the program is can be downloaded for program evaluation. The trial version demonstrates full functionality of the solution except for the ability to recover files. You must register the program to unlock it. The software can be purchased for as low as \$XX.XX. Registered customers are entitled to free priority technical support by email and access to program updates. Further information on Hetman Uneraser, a list of features and a tutorial are available at: <http://www.hetmanrecovery.com/>
