<Char\_Desc\_45>A feature-packed playback automation tool</Char\_Desc\_45>

<Char\_Desc\_80>A feature-packed and affordable music broadcasting and playback automation tool</Char\_Desc\_80>

<Char\_Desc\_250>If you are looking for an efficient way to automate music playback in your place or your own radio station, RadioBoss is your ideal choice! Be the boss of your business and let RadioBoss take care of the grooves and good vibes around!</Char\_Desc\_250>

<Char\_Desc\_450>RadioBoss is an extremely powerful tool that gives you complete control over music conversion, playback scheduling, playlist generation, CD grabbing, automatic volume control, transition effects and much more! When it comes to music playback automation, few products can compete against RadioBoss. Combining ease of use and affordability with the “configure-and-forget” concept, this tool will become an irreplaceable aide in your daily work.</Char\_Desc\_450>

<Char\_Desc\_2000>If you run a bar, a restaurant, a shop, a casino, a dance club or even a radio station, music becomes one of your key daily priorities. Music is what keeps your guests' spirit high, what makes them stay longer, enjoy their time and, of course, spend money and come back again. Therefore, as an owner of a popular place or radio station, you should devote proper time to putting together a decent collection of tracks, organizing them in the right order and delivering the right music at the right time. If you are looking for a way to automate music playback in your place or on your own radio station, RadioBoss is your choice!

RadioBoss is an extremely powerful tool that gives you complete control over the playback process, including conversion, scheduling, playlist generation, CD grabbing, automatic volume control, transition effects and much more! When properly configured, the software can work autonomously for months, so you won't need to hire a full-time DJ to keep the beats pumping. RadioBoss offers tons of great features that will help you create an ultimate virtual DJ: template-based playlist generator, support of major music formats (including Internet streams), streaming capabilities, instant searches in the music database, dynamic volume adjustment, various audio effects (echo, reverb, flanger, tempo, pitch), 12-band equalizer, silence trimming, color indication in playlists, a powerful tag editor and a whole lot more. Novices will be delighted to explore the virtually endless capabilities of the software, while professionals will definitely
